

# Service-Learning Experience Criteria – Initial Development

Use this form to develop reference criteria as you identify community partners and service experiences for your students. What you develop here should be considered a **starting point only** and should be modified as you work with partner organizations to incorporate and address community needs.

<b>Will the service need to be centered on a particular topic or population? If yes, define.</b>			
<b>1. What are your course learning goals?</b>	<b>2. How can this be measurably achieved or enhanced through reflection assignments?</b>	<b>3. What would students need to be exposed to/experience to enable their reflection to address this learning goal?</b>	<b>4. What type of service interactions/activities will facilitate this reflection?</b>
